

Multivalve

FLOW SOLUTIONS

Multivalve are a Newcastle based company owned and operated by Barry Smith and Steve Thurlby. Our Vision is to become **the recognised benchmark in industrial valve testing repair and supply** which others aspire.

A company that is flexible, dynamic and passionately proactive in developing quality partnerships with customers, suppliers, shareholders, employees and the community.

The Multivalve Service to our customers extends far beyond the supply of quality product. Our team of fully trained and qualified tradesmen and engineers have over 75 years combined experience in the valve industry.

Our maintenance team are backed by our impressive product range, allowing us to offer, service, supply, install, commissioning and ongoing maintenance. With onsite and workshop repair capabilities and with 24 hour on call service; downtime is a thing of the past.

Whether you require Safety Relief Valves, Control Valve Maintenance, Boiler Level Measurement Equipment, Burner Technology, Naval Valves or Actuators, our expertise in system design, engineering, ongoing service and maintenance ensures a greater overall level of service and cost efficiency.

Multivalve believes in operating as a pro-active partner in your plants performance. We align ourselves with your goals and objectives for plant availability, reliability and efficiency. We ensure your plant will be maintained to industry "best practice" standards, a promise you can rely on.
